Education

McMaster University — Hamilton, ON

Bachelor of Applied Science in Computer Science — *Sept. 2022 – Expected May 2027*

- GPA: 3.94 / 4.00
- Awards: Engineering Award of Excellence, Deans' Honours List, University Senate Scholarship
- Relevant Coursework: Databases (SQL), Data Structures and Algorithms, Machine Learning (Python, NumPy, scikit-learn, PyTorch), Computer Architecture (C)

Work Experience

Freelance Software Engineer — July 2026 – Aug. 2026

Self-Employed — *Remote*

- Developed and delivered a production Shopify B2B storefront for a wholesale client, implementing customer approval, three-tier pricing, and server-side checkout validation using Liquid and BoomGate.

Software Engineer Intern — Jan. 2026 – Aug. 2026

TELUS — *Toronto, ON*

- Built a TypeScript + React dashboard with a Golang service, integrating REST APIs to visualize 500,000+ hours of real-time GPU instance usage data by 30+ organizations on the Sovereign AI Factory platform
- Translated 20+ Figma designs into production React and TypeScript pages, building responsive, reusable UI components consistent with company design standards
- Took initiative to research and propose Playwright beyond the team's initial Cypress evaluation, demonstrating superior parallel test execution and driving its adoption

Software Engineer Intern — May 2025 – Dec. 2025

Scotiabank — *Toronto, ON*

- Configured and deployed Terraform infrastructure for Dynatrace SSL certificate monitoring across 100+ application endpoints, ensuring timely alerting for certificate expirations
- Developed Dynatrace DQL queries to filter infrastructure issues (e.g. SSL certificate expiries, timedrift server errors) within millions of logs
- Created Dynatrace dashboards using DQL to track SSL certificate statuses, tripling verification speed; presented the solution to 50+ stakeholders, including VPs and Senior Managers across multiple development teams

Assistant Health and Safety Analyst — May 2024 – Aug. 2024

Toronto Transit Commission — *Toronto, ON*

- Analyzed and classified 4,000+ construction submittals using Excel pivot tables to identify and present patterns across project data

AI Software Developer Intern — May 2023 – Aug. 2023

SequoiaDB Ltd. — *Markham, ON*

- Constructed demonstration scripts for HNSW and IVF in Python using NumPy and NMSLIB for nearest neighbour querying
- Developed Python scripts using Gensim to generate word embeddings with user-specified dimensionality and comprehensive unit tests, reducing testing time by 10%

Projects

Goulding Park Slopitch Website | *Next.js, PostgreSQL, Supabase* — Apr. 2026 – Present

- Built a Next.js application for the commissioner of the Goulding Park Slopitch league to manage schedules, standings, player statistics, and game results, reducing stats entry time by 50% and averaging 170 weekly viewers for a 55+ player (4-team) league
- Designed a PostgreSQL (Supabase) database with secure authentication and dynamic data retrieval

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, Go, Bash, C, Java
Frameworks: React, Next.js, Flask, Spring Boot
Tools & Platforms: Git, Terraform, Dynatrace, Supabase, Linux/Unix
