EDUCATION

McMaster University

Hamilton, ON

Bachelor of Applied Science in Computer Science

Sept. 2022 – Expected Apr. 2027

- GPA: 3.94 / 4.00
- Awards: Engineering Award of Excellence, Deans' Honours List, University Senate Scholarship
- Relevant Coursework: Databases (**SQL**), Development Basics (**C**, **Git**, **Linux/Unix**, **Bash Scripting**), Data Structures and Algorithms, Introduction to Software Development (**Java**, **OOP**), Introduction to Machine Learning (**Python**, **NumPy**, **SciKit-Learn**, **Pytorch**), Computer Architecture (**C**)

WORK EXPERIENCE

Freelance Software Engineer

Aug. 2026 – Present

Self-Employed

Remote

- Engineered a **Shopify** Storefront using **Liquid** with customer-tag-based authorization, three-tier pricing levels and server-side checkout validation via BoomGate to prevent unauthorized purchases

Software Engineer Intern

Jan. 2026 – Aug. 2026

TELUS

Toronto, ON

- Built a **TypeScript** + **React** dashboard with a **Golang** service, integrating **REST APIs** to visualize 500,000+ hours of real-time GPU instance usage data by 30+ organizations on the Sovereign AI Factory platform
- Translated 20+ Figma designs into production-ready **React** and **TypeScript** pages, building responsive, reusable UI components while ensuring consistency with company branding and design standards

Software Engineer Intern

May 2025 – Dec. 2025

Scotiabank

Toronto, ON

- Configured and deployed **Terraform** infrastructure for **Dynatrace** SSL certificate monitoring across 100+ application endpoints, ensuring timely alerting for certificate expirations
- Developed **Dynatrace** DQL queries to filter infrastructure issues (e.g. SSL certificate expiries, timedrift server errors) within millions of logs
- Acted as main point of contact for SSL Certificate Monitoring project managing external requests and ensuring timely communication with internal team members, regularly providing progress updates
- Created and managed Dashboards to track SSL Certificate Statuses on **Dynatrace** with DQL queries, tripling verification speed; presented the solution to 50+ stakeholders including VPs and Senior Managers across multiple development teams

Assistant Health and Safety Analyst

May 2024 – Aug. 2024

Toronto Transit Commission

Toronto, ON

- Spearheaded a 3 month project to classify and analyze patterns and distributions found in 4000+ construction submittals using **Excel** pivot tables presenting patterns and distributions across project data

AI Software Developer Intern

May 2024 – Aug. 2024

SequoiaDB Ltd.

Markham, ON

- Produced demonstration scripts for HNSW and IVF in **Python** using **NumPy** and **NMSLIB** for nearest neighbour querying
- Constructed **Python** scripts that convert words to vectors of user specified dimensionality using **Gensim** library with full unit tests, expediting the testing process by 10% for the testing team

PROJECTS

Goulding Park Slopitch Website | *React, PostgreSQL, Supabase*

Apr. 2026 – Present

- Built a **Next.js** application for the commissioner of the Goulding Park Slopitch league to manage schedules, standings, player statistics, and game results, reducing stats entry time by 50% and averaging 170 weekly viewers for a 55+ player (4 team) league

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Go, Bash

Frameworks: React, Next.js, Flask, Spring Boot

Tools & Platforms: Git, Terraform, Dynatrace, Figma, Supabase, Linux/Unix
